1 Introduction	1
Surface Ripples and Vertical Chains	1
Multipliers in Practice: A Hypothetical Case Study	3
Building Tools for Job-Chains Analysis	6
2 Labor Markets and Trickle Down	11
Underemployment and Labor Markets	13
Trickle Down and Economic Development	17
Conclusions	20
Notes	21
3 The Problem with Impact Analysis: Counting Everything, Valuing Nothing	23
Issues in Impact Analysis	26
All-or-Nothing Evaluations	27
Studies and Applications	31
Synthesizing the Applications	33
The Limits to Existing Approaches	42
Conclusions	46
Notes	47
4 Delving beneath the Surface: Job Chains in the Evaluation of Local Economic Development	49
Defining Job Chains	52
Applications of the Job-Chains Metaphor	57
A General Model of Job Chains	61
The Mechanics of Job Chains: A Leontief Approach	64
Job Chains and Trickle Down: Three Propositions	70
Conclusions	72
Notes	73
5 Operationalizing a Job-Chains Approach	75
The Need for Empirical Research	75
An Empirical Strategy	77
The Panel Study of Income Dynamics	79
Estimating the Augmented Q Matrix	80

Chain Lengths	83
Individual Welfare Gains	86
Welfare Gains along Average Chains	92
Sensitivity Analysis	94
Expanding on Impact Analysis	95
Conclusions	101
Notes	102
6 Extensions	105
Boom and Bust	105
Goods and Services	112
Internal and External Hiring	115
Conclusions	117
Notes	119
7 Job Chains—Implications for State and Local Economic Development Policy	121
Economic Development Policy Themes	122
Trickle Down—Does It Really Work?	127
Thinking “Chain-Wise”—Why It Helps	128
Notes	130
Appendix A: Unemployment and Underemployment	131
Appendix B: Formal Treatment of Trickle Down	141
Appendix C: Data	147
References	157
The Authors	167
Index	169
About the Institute	179

Figures

1.1	Horizontal Multiplier	4
1.2	Job-Chains and Vertical Multipliers	5
4.1	Horizontal Surface Multiplier (a) and Vertical Job-Chain Multiplier (b)	51
4.2	Welfare Sensitivity	63

Tables

3.1	Studies of Employment Effects of State and Local Economic Development Projects	34
3.2	Synthesis of Economic Development Studies: Efficiency Measure—Cost per Job	41
3.3	Hypothetical Case Study: Benefits and Costs of SciSource Scientific Instruments Plant	42
3.4	Hypothetical Case Study, SciSource Instruments: Distribution of Employment and Earnings, by Income Groups	44
4.1	A Comparison of Multipliers	52
4.2	Hypothetical Local Q Matrix	65
4.3	Hypothetical Local Vacancy Multipliers	68
5.1	Basic Origin–Destination Matrix	82
5.2	Disaggregated Multiplier Matrix	85
5.3	Average Wage Gains by Job Changers	86
5.4	PSID Wage Equation, 1992	88
5.5	Efficiency and Distributional Effects	93
5.6	Sensitivity Analysis of Efficiency Results	94
5.7	Distribution of New Jobs and All Vacancies by Earnings Groups: Instruments Plant	96
5.8	Distribution of New Earnings and Welfare Gains across <i>Ex Post</i> Earnings Groups	97
5.9	Welfare Gains by <i>Ex Ante</i> Earnings Groups	98
5.10	Distribution of New Jobs and All Vacancies by Earnings Groups: Consulting Firm	99

5.11	Distribution of New Earnings and Welfare Gains across <i>Ex Post</i> Earnings Groups: Consulting Firm	100
5.12	Gains by <i>Ex Ante</i> Earnings Groups: Consulting Firm	101
6.1	Origin–Destination Matrices: Boom (1987–1990) and Bust (1990–1993)	106
6.2	Job Multiplier V/w , and Trickle Down in Boom (1987–1990) and Bust Years (1990–1993)	107
6.3	Regions Used to Disaggregate National Matrices	108
6.4	Job Multipliers, V/w , and Trickle Down, by Regions	109
6.5	Origin–Destination Matrix and Job Multipliers for Industry and Services, by Wage Group	113
6.6	Job-Chains Matrix Broken Down by Inside and Outside Movers	115
6.7	Lower Limits for Job Multipliers	116
6.8	Gains (in \$) to Inside and Outside Workers in Groups 4 and 5	117
C.1	Employed Persons, by Relation to Head of Household or Family, CPS and the PSID	151
C.2	Included and Excluded Job Changes from the PSID	155
