Preface	xiii
1 Summary and Synthesis	1
<i>Peter J. Kuhn</i>	
Institutions Affecting Displaced Workers	3
Methodological Lessons for the Study of Displaced Workers and for Cross-National Labor Market Research	13
Within-Country Patterns: Exceptions and Universals	22
Patterns Among Countries	34
Future Directions	48
Notes	51
References	101
2 Displaced Workers in the United States and the Netherlands	105
<i>Jaap H. Abbring, Gerard J. van den Berg, Pieter A. Gautier, A. Gijsbert C. van Lomwel, Jan C. van Ours, Christopher J. Ruhm</i>	
Institutional Environment	107
Data	112
Displacement Rates	116
Transitions	124
Conclusion	138
Appendix: Details of Dutch Data Sources	181
References	190
3 Worker Displacement in Japan and Canada	195
<i>Masahiro Abe, Yoshio Higuchi, Peter Kuhn, Masao Nakamura, Arthur Sweetman</i>	
Employment Adjustment Mechanisms	200
Legislation and Institutions Affecting Displaced Workers	206
General Economic Conditions	220
Rates of Separation and Displacement	221
Labor-Force Transitions After Displacement	231
Wage Changes	235
Combining Incidence and Consequences: The Prevalence of Severe Separation-Induced Wage Loss	243
Emerging Issues: Where to Go From Here?	245
Notes	250

Appendix: Japanese Industries Eligible for Employment	293
Maintenance and Adjustment Subsidies	
References	298
4 They Get Knocked Down. Do They Get Up Again?	301
<i>Jeff Borland, Paul Gregg, Genevieve Knight,</i>	
<i>Jonathan Wadsworth</i>	
Labor Market Background	303
Institutions	306
Results	319
Conclusions	336
Notes	337
Appendix: Data Construction	365
Appendix Note	368
References	370
5 Worker Displacement in France and Germany	375
<i>Stefan Bender, Christian Dustmann, David Margolis,</i>	
<i>Costas Meghir</i>	
Introduction	375
Institutions	377
Data	387
Discussion and Conclusions	416
Conclusion	418
Notes	418
Appendix A: Correction for False Firm Deaths in France	445
Appendix Note	445
Appendix B: Definitions of Displacement	447
Appendix C: Impact of Retirement Constraint in France	449
Appendix D: Descriptive Statistics for France	451
Appendix E: Treatment of Censoring in Germany	453
Appendix F : Descriptive Statistics for Germany	455
Appendix G: Probit Models for the Incidence of Displacement Using	459
the Continuously Employed as the Reference Group in France	
Appendix H: Weibull Proportional Hazard Model for Germany	461
Appendix I: Estimates Comparing Different Definitions of	465
Displacement for Germany	
References	468

6 Employment Protection and the Consequences for Displaced Workers	471
<i>Karsten Albæk, Marc Van Audenrode, Martin Browning</i>	
Introduction	471
Labor Market Institutions	472
Data	478
Results	481
Conclusions	490
Notes	491
Appendix: Data Selection and Definitions	505
References	511
 The Authors	 511
 Cited Author Index	 513
 Subject Index	 517
 About the Institute	 543

Figures

2.1 Netherlands: The Annual Rate of Displacement	120
2.2 United States: Labor Force Participation Rates of Displaced and Nondisplaced Males	136
2.3 United States: Retirement/Disability Rates of Displaced and Nondisplaced Males	136
 3.1 Wage Profiles by Age and Education, Japan	 201
3.2 Shukko and Age Distribution of Workers at a Large Japanese Steel Company, 1977	203
3.3 Methods of Employment Adjustment at Manufacturing Establishments between 1987 (Q1) and 1994 (Q2)	204
 5.1 Kaplan-Meier Survivor Functions, France	 401
5.2 Kaplan-Meier Survivor Functions, Germany	404
5.3 Average Daily Earnings Over Time by Type of Separation, France	406
5.4 Average Daily Earnings Over Time by Type of Separation, Germany	409
 C.1 Impact of Retirement Constraint by Age at First Separation for France	 449

Tables

1.1 Institutions Affecting Displacement: Employment-Protection Laws	56
1.2 Institutions Affecting Displacement: Unemployment Insurance Systems	60
1.3 Institutions Affecting Displacement: Unions and Minimum Wages	64
1.4 Displacement and Gender: Are Men More Likely to Be Displaced?	66
1.5 Displacement and Skills: Are Unskilled Workers More Likely to Be Displaced?	67
1.6 Displacement and Age: Are Younger Workers More Likely to Be Displaced?	69
1.7 Displacement and Tenure: Are Low-Tenure Workers More Likely to Be Displaced?	71
1.8 Joblessness and Gender: Do Displaced Women Experience More Joblessness?	72
1.9 Joblessness and Skills: Do Skilled Displaced Workers Experience Less Joblessness?	74
1.10 Joblessness and Age: Do Older Displaced Workers Experience More Joblessness?	76
1.11 Joblessness and Tenure: Do High-Tenure Displaced Workers Experience More Joblessness?	78
1.12 Wage Loss and Tenure: Do High-Tenure Displaced Workers Experience Larger Wage Losses?	81
1.13 Wage Loss and Age: Do Older Displaced Workers Experience Larger Wage Losses?	84
1.14 Wage Loss and Gender: Do Displaced Women Experience Larger Wage Losses?	87
1.15 Wage Loss and Skills: Do Skilled Displaced Workers Experience Smaller Wage Losses?	89
1.16 Who Loses Most from Displacement across Countries? The Effects of Gender, Age, Tenure, and Skill Level	92
1.17 Annual Displacement Rates: International Comparisons	93
1.18 Postdisplacement Unemployment: International Comparisons	97
1.19 Displacement-Induced Percentage Wage Changes: International Comparisons	99
2.1 Netherlands: Overview of the Data Sets	150
2.2 United States: “Lower-Bound” Estimates of Annual Displacement Rates	152
2.3 United States: Estimated Annual Displacement Rates during the 1993–95 Period by Predisplacement Job Tenure	153

2.4	United States: Estimated Annual Displacement Rates during the 1993–95 Period by Age	154
2.5	Netherlands: Reported Labor Market States of Workers at Strongly Shrinking Firms, 1993–96 (% of Employment at all Firms)	155
2.6	Annual Displacement Rates by Tenure during the 1993–95 Period	56
2.7	Netherlands: Displacement and Other Separation Frequencies, 1993–96	157
2.8	Netherlands: Logit Estimates of Probability of Displacement	159
2.9	Netherlands: Simulated Annual Displacement Probabilities	161
2.10	United States: Duration of Postdisplacement Joblessness	163
2.11	United States: Labor-Force Status of Displaced Workers	164
2.12	United States: Econometric Estimates of the Determinants of Postdisplacement Joblessness	165
2.13	Netherlands: Displacement by Motivation and Transition	167
2.14	Netherlands: Reported Labor Market States of Separated Workers by Net Employment Change	167
2.15	Netherlands: Labor Market State One Year after Displacement by Transition	168
2.16	Netherlands: Median Residual Reemployment Durations	169
2.17	Netherlands: Mixed Proportional Hazard Estimates of Reemployment Durations	170
2.18	Netherlands: Simulated Reemployment Probabilities	172
2.19	United States: Ratio of Average Survey Date and Predisplacement Weekly Earnings	173
2.20	Distribution of the Ratio of Survey Date to Predisplacement Wages	174
2.21	United States: Econometric Estimates of the Determinants of Postdisplacement Earnings and Earnings Changes	175
2.22	Netherlands: Estimates of Changes in Earnings after Displacement	177
2.23	United States: Survey Date Labor-Force Status of Displaced Workers	179
2.24	United States: Survey Date Labor-Force Status of Displaced and Nondisplaced Males	180
2.A1	Netherlands: Weighted Means in FE Data for the 1993–96 Period	187
2.A2	Netherlands: Some Characteristics of UI Data	188
2.A3	Netherlands: Characteristics of LFS Earnings Sample	189
3.1	Notice Requirements for Termination of Employment in Various Jurisdictions of Canada, 1997	256
3.2	Worker-Reported Advance Knowledge or Formal Notice of Permanent Layoff among Workers Experiencing Permanent Layoffs in Canada	258

3.3	Employment Insurance Entitlements in Japan	259
3.4	Minimum Wages as a Percentage of Prevailing Wages in Selected Countries	260
3.5	Annual Separation Rates for 1995	261
3.6	Reasons for Job Separations in Japan 1995	263
3.7	Firm- and Self-Reported Reasons for Separation in Canada	264
3.8	Estimated Annual Displacement Rates in Canada and Japan, 1995	266
3.9	Firm and Worker Recall Expectations in Canada	268
3.10	Recall Expectations versus Realizations in Canada	269
3.11	Kaplan-Meier Cumulative Reemployment Rates for Displaced Workers in Japan and Canada	270
3.12	Cox Proportional Hazard Coefficients for Displaced Workers' Jobless Durations in Japan	271
3.13	Cox Proportional Hazard Coefficients for Displaced Workers' Jobless Durations in Canada	272
3.14	Distributions of Wage Changes by Separation Reasons and Age in Japan	274
3.15	Distributions of Wage Changes by Separation Reasons and Age in Canada	278
3.16	Mean Wage Changes by Tenure for Permanently Laid-Off Workers in Canada	280
3.17	Mean Tenure by Age and Gender for All Employed Workers in Japan and Canada	280
3.18	Determinants of Wage Changes for Male Workers Who Found Jobs within One Year in Japan	281
3.19	Determinants of Wage Changes for Female Workers Who Found Jobs within One Year in Japan	284
3.20	Determinants of Wage Changes for Permanent Separations and Laid-Off Workers Who Found Jobs within One Year in Canada	287
3.21	The Incidence of Severe and Moderate Separation-Induced Wage Losses and Wage Gains in Canada and Japan	290
3.A1	Special Employment Adjustment Industries	294
3.A2	Employment Adjustment Subsidy Industries	297
4.1	Average Annual Separation and Displacement Rates in Britain, 1990-96	339
4.2	Separation and Displacement Rates by Worker and Firm Characteristics in Britain	340
4.3	Who Is Displaced? Multinomial Logit and Binary Logit Estimates for Britain	342
4.4	Labor-Force Status One Year Later in Britain	344

4.5	Kaplan-Meier Estimates of Hazard and Survival Rate of Return to Work in Britain	344
4.6	Cox Estimates of Time to Return to Work for Displaced Workers in Britain	345
4.7	Mean Log Weekly Wage Growth by Labor Market Status in Britain	347
4.8a	Mean Weekly Wage Growth by Labor Market Status in Britain	348
4.8b	Mean Log Weekly Wage Changes: Full-Time to Full-Time in Britain	349
4.9	OLS Log Wage-Growth Regressions for Separating Groups in Britain	350
4.10	OLS Log Wage-Change Estimates for Britain	351
4.11	Annual Rates of Job Separation	352
4.12	Average Rate of Job Displacement in Australia from 1983 to 1997	353
4.13	Incidence of Displacement and Reemployment of Displaced Workers in Australia	354
4.14	Labor Force Status of Displaced Workers in Australia	356
4.15	Estimated Kaplan-Meier Hazard and Survival Rate of Return to Work in Australia	358
4.16	Determinants of Probability of Exit from Non-Employment—Marginal Effects for Australia	359
4.17	Predisplacement and Postdisplacement Work Time in Australia	360
4.18	Predisplacement and Postdisplacement Average Log Weekly Earnings in Australia	361
4.19	Determinants of Ratio of Predisplacement and Postdisplacement Weekly Earnings in Australia	363
4A.1	Unemployment Benefit Replacement Rates for Single-Earner Households in Britain, 1995	369
4A.2	Unemployment Benefit Replacement Rates for Single-Earner Households in Australia, 1995	369
5.1	Incidence of Permanent Separations of Long-Tenure Workers by Year in France	426
5.2	Incidence of Permanent Separation by Previous Seniority and Age in France in 1984	427
5.3	Probit Models of Incidence of Separation, Total and by Type of Separation Relative to All Alternative States for France in 1984	428
5.4	Breakdown of Separations by Type and Seniority for Germany	429
5.5	Probability of Displacement or Separation between 1984 and 1990 in Germany—Marginal Effects	430

5.6	Non-Employment Spells after First Separation by Seniority in France	431
5.7	Weibull Proportional Hazard Models for Return to Work for France	432
5.8	Non-Employment Spells after Separation by Seniority in Germany	434
5.9	Cox Models for Return to Work for Germany	435
5.10	Two-Period Earnings Growth by Seniority at Date of First Separation in France	437
5.11	Two-Period Log Earnings Growth, by Seniority at Date of First Separation for Germany	438
5.12	Log Average Real Daily Earnings Regressions for France	439
5.13	Earnings Regressions for Censored Regression Models for Germany: Displaced Workers Only	441
5.14	Earnings Regressions for Censored Regression Models for Germany	443
B.1	Type of Closures for France and Germany	448
D.1	Sample Statistics for 1984 for France	451
E.1	Separation and Censoring in Germany	453
F.1	Sample Statistics for 1984 for Germany	456
G.1	Probit Models of Incidence of Separation by Type Relative to Continuously Employed in France in 1984	460
H.1	Weibull Proportional Hazard Models for Germany	462
I.1	Constrained Earnings Regressions for Germany: Displaced Workers	466
6.1	Labor Market Characteristics	492
6.2	Macroeconomic Environment in Belgium and Denmark	492
6.3	Incidence of Displacement among Private Sector Workers in Belgium and Denmark	493
6.4	Characteristics of Displaced Workers with Tenure of at least Three Years in Belgium and Denmark	494
6.5	Factors Affecting the Probability of being Displaced, Compared with Nondisplaced Workers in Belgium and Denmark	496
6.6	Unemployment for Long-Tenure Displaced Workers in the Three Years after Displacement	497
6.7	Reemployment after Displacement in Belgium and Denmark	498
6.8	Duration Analysis of Reemployment for Long-Tenure Workers in Belgium and Denmark	499
6.9	Average Annual Earnings and Earnings Growth for Long-Tenure Workers by Years after Displacement	500
6.10	Average Wages and Wage Growth for Long-Tenure Workers	502
6.11	Regression Analysis of Wages in Subsequent Job	504
