Preface	ix
1 Low-Skilled Jobs: The Reality behind the Popular Perceptions	1
What Are Low-Skilled Jobs?	3
Who Fills Low-Skilled Positions?	8
The Economic Environment Facing Workers in Low-Skilled Positions	11
The Argument for Skills	14
Policy Solutions	15
First Chance: Building Skills in Public Schools	17
Second Chance: Out-of-School Programs	18
Demand Side	19
Safety Nets	20
Summary	21
2 Local Labor Markets and Low-Skilled Jobs: Theory and Data	25
The Conventional Description of the Market for Workers in Low-Skilled Jobs	26
An Alternative to the Conventional View	27
Our Data	29
Summary	43
3 How Skills Matter	49
Skill Patterns Exist across Occupations and Industries	51
Wages and Training Do Not Change with Labor Market Changes	55
Skills with High Relative Demand Increase Wages	59
Summary and Conclusions	70
4 Recruiting and Screening Workers in Low-Skilled Positions	73
Firms' Recruiting and Screening of Workers Varies with Firm Size	77
Firms' Recruiting and Screening Methods Are Related to Skills	80
Firms Modify Recruiting and Screening Methods with Labor Market Conditions	81
More-Skilled Individuals Use More Sophisticated Job Search Methods for Low-Skilled Positions	85
Summary and Conclusions	85

5 Skills, Promotions, and Low-Skilled Positions	91
Promotional Opportunities with Expanded Duties Exist	94
Skills in the Entry-Level Position are Correlated with Skills in the Next Position	97
Successful Applicants Have Above-Minimum Qualifications	104
Skill Requirements in Entry-Level Jobs Do Not Determine Advancement Potential	106
Summary and Conclusions	108
6 Labor Markets for Workers in Low-Skilled Positions: How Can Policies Help Workers?	111
The Labor Market for Workers in Low-Skilled Positions: The Employer's View	112
The Labor Market for Workers in Low-Skilled Jobs: The Worker's View	115
The Second-Chance Policy Solution: WIA Training Policy Implications	126
	132
Appendix A: Background Tables and Variable Construction	139

About the Institute	193

Tables

1.1 Industrial and Occupational Distribution of Low-Skilled Jobs	4
1.2 Knowledge, Skills, and Abilities Used in Low-Skilled Jobs	6
1.3 Demographics and Cohort Aging of Workers in Low-Skilled Jobs (% of population)	10
1.4 Income and Labor Market Challenges for Workers with Low, Medium, and High Skill (% of population)	12
2.1 Demand for and Supply of Skills in the BALS Labor Market	36

3.1	BALS Employers' Ability to Find Qualified Applicants in Differing Labor Markets (% responding affirmatively)	50
3.2	Occupational Differences in Skill Use in Low-Skilled Jobs	56
3.3	Differences in Skill Requirements by Industry Sector (%)	60
3.4	Compensation and Training Offered by Firms in Different Labor Markets (% employers responding affirmatively)	62
3.5	Wage Differential by Type of Skill, Occupation	63
3.6	Occupational Wage Coefficients by Skills and Institutional Factors	66
3.7	BALS Jobs That Use Each Skill Set, by Demographic (%)	68
4.1	Percentage of Low-Skilled Workers Affected by Recruiting and Screening Methods, by Firm Size	78
4.2	Factor Analysis of Skills Required, by Firm Size	79
4.3	Correlation between Skills and Recruiting and Screening Methods	82
4.4	Percentage of Low-Skilled Workers Affected by Recruiting and Screening Methods, by Type of Labor Market	84
4.5	Skills, Work Experience, and Education: Supply Side	86
4.6	Job-Seeking by Low-Skilled Individuals	88
5.1	Differences in Promotional Opportunities by Occupation	95
5.2	Skills Required in the Entry-Level Job and Next Position	98
5.3	Skill Set Correlations between Entry-Level Job and Next Position	101
5.4	Percentage of Skills Used in the Position above Entry Explained by Entry-Level Skills: Canonical Correlation Analysis	103
5.5	Human Capital Needed to Obtain, Succeed, and Advance	105
5.6	The Relationship between Skills and Occupational Wages: Odds Ratios	107
6.1	Low-Skilled Jobs and WIA Training in the Bay Area Local Labor Market	128
6.2	Employment Probabilities and Types of WIA-Funded Training in the Bay Area Local Labor Market	131
A.1	Mapping Skills	140
	a. Reading and Writing English	140
	b. Math	141
	c. Problem-Solving	142
	d. Communication	143
	e. Computer Software	144
	f. Job Equipment	145
A.2	Job Duties in BALS Jobs	146

A.3	Skills Needed in Low-Skilled Jobs: Factor Analysis of O*NET Data	158
A.4	Skills Needed in Low-Skilled Jobs: Factor Analysis of BALS Data	161
A.5	Definition of Variables Used in the Analysis of Occupational Wages	164
A.6	Types of Entry-Level Jobs and Promotions Available	168
